Setting Up Your DAWN Plus UV Air Purifier

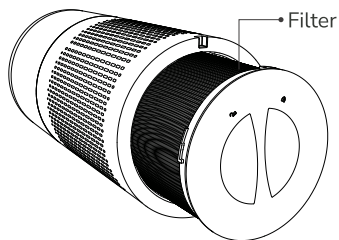

Powering Up Your DAWN Plus UV Air Purifier

To start using your DAWN Plus UV Air Purifier, connect the power cable to the bottom power port. Then, plug it into a suitable power supply, and you're ready to begin operation.

Note: Filter has been pre-installed

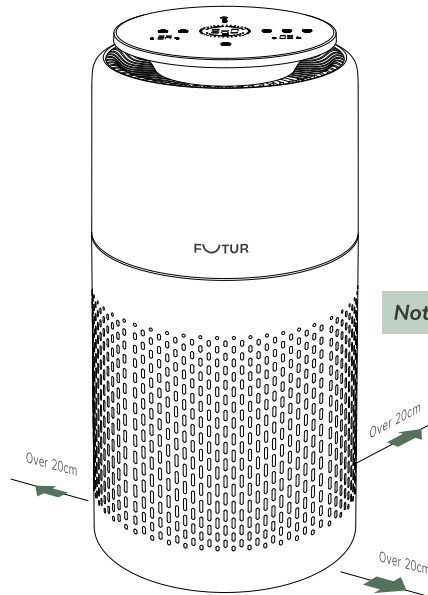

Your DAWN Plus UV Air Purifier comes with the filter pre-installed for your convenience. Just power it on, and you're good to go.

Optimal Placement For Your DAWN Plus UV Air Purifier

When in use, ensure that the air inlet maintains a certain distance from walls and other shielding objects. This allows for proper air circulation and enhances the purifier's efficiency in removing pollutants.

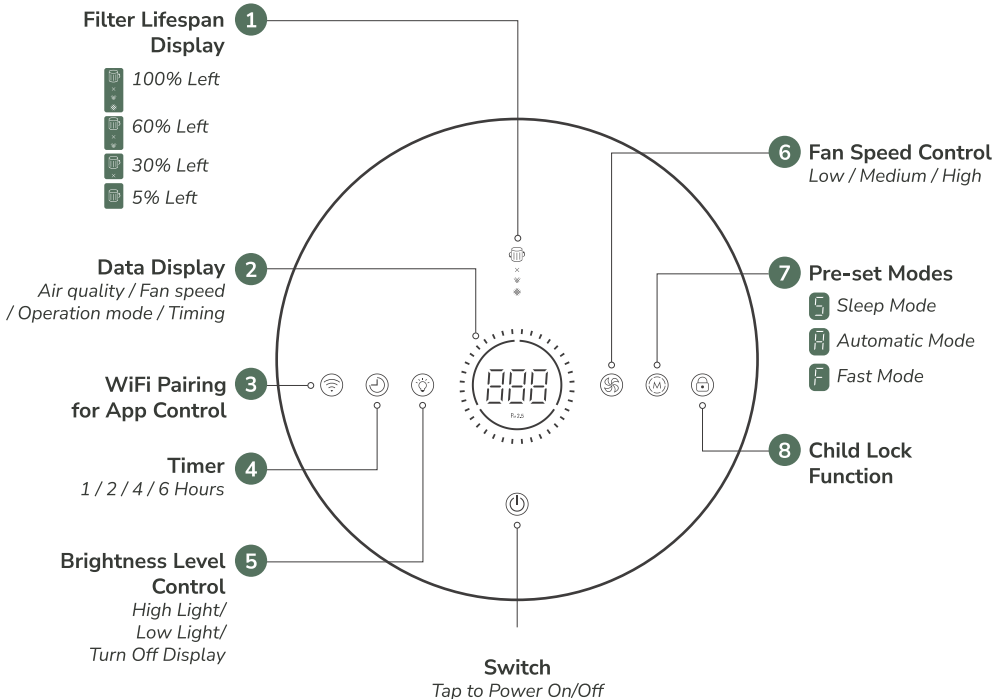

Additionally, we recommend keeping a certain distance between the back sensor and the wall to ensure accurate detection and optimize the purifier's sensor-based features.

Note: Sensor is located at the back

Product Operation Guide

Experience effortless operation with our DAWN Plus UV Air Purifier's intuitive touch screen panel. Explore the purpose of each feature explained below.

1

Filter Lifespan Display

Our DAWN Plus UV Air Purifier comes equipped with an intelligent filter lifespan feature to ensure optimal performance.

100% Left
(New Filter)

60% Left

30% Left

5% Left

The user-friendly display provides real-time updates on the filter's condition, indicating 100%, 60%, 30%, and 5% filter life remaining. Regularly monitor the filter status and replace it in a timely manner to maintain the air purifier's efficiency and effectiveness. By doing so, you can continue enjoying cleaner and healthier air.

When the filter reaches 0%, replace it and reset the filter lifespan panel by pressing the  for 3 seconds. A confirming beep will sound, and the touch panel will display  to indicate that the filter has been fully replaced (100% lifespan).

2

Data Display

DAWN Plus features an intuitive data display panel. Track air quality index, air pollutant rate, fan speed, operation mode, and timer settings at a glance.

The DAWN Plus UV Air Purifier is equipped with a highly sensitive PM2.5 sensor that constantly monitors the air quality in your surroundings. The air quality is conveniently displayed on the panel touch screen in numeric digits, allowing you to easily track the current conditions.

Additionally, the display light at the air inlet provides a visual indicator of the air quality status. When the light is blue, you can be assured of good air quality. A yellow light indicates moderate air quality, and a red light signifies poor air quality, where the air purifier will work to purify the surrounding air.

3

WiFi Pairing for App Control

Connect your DAWN Plus UV Air Purifier to our user-friendly app for comprehensive controls and real-time monitoring. Adjust settings, check air quality data, and set schedules remotely from your smartphone with ease.

Follow these simple steps to pair:

1. Ensure your mobile phone's WiFi, Bluetooth, and location services are enabled.
2. Download the "Smart Life" app from Google Play or App Store.

3. Create an account within the "Smart Life" app.
4. On the app's home page, press the "+" icon on the top right to add a device.
5. Turn on your air purifier, then press and hold the "WiFi" button on the display panel for 3 seconds until it beeps.
6. The app will automatically start scanning for the device. Follow the instructions to complete the pairing process.

Note: For successful pairing, make sure your mobile phone is connected to a 2.4GHz WiFi network.

4

Timer (1 / 2 / 4 / 6 Hours)

Our DAWN Plus UV Air Purifier offers a user-friendly Timer feature, designed for your convenience. This feature allows you to set a specific duration for the air purifier to operate before automatically turning off. Simply tap the timer button to control it.

1. Tap once for 1 hour purification,
2. Tap twice for 2 hours purification,
3. Tap thrice for 4 hours purification,
4. Tap four times for 6 hours purification,
5. Tap five times to cancel the timer.

5

Brightness Level Control

Enjoy the perfect ambiance with our DAWN Plus UV Air Purifier's brightness level control. There are three settings to choose from: high light, low light, and no light. The air quality indicator lights show red for poor air quality, green for moderate, and blue for good air quality. Similarly, the touch screen display is also illuminated.

To customize the brightness:

1. Tap once for high light,
2. Tap twice for low light,
3. Tap thrice to turn off the display completely

Whether you prefer a well-lit environment or a darker space with minimal disruptions, you have the flexibility to adjust the brightness to your liking. Create a healthier and comfortable living space effortlessly.

6

Fan Speed Control

Experience optimal air purification with our DAWN Plus UV Air Purifier's fan speed control. Easily adjust between three settings: low, medium, and high, to meet your unique air purification needs.

1. Tap once for low-speed setting. Display panel should show "1"
The low-speed setting provides gentle purification, ideal for maintaining a quiet and peaceful environment.
2. Tap twice for medium-speed setting. Display panel should show "2"
The medium-speed setting provides more robust air cleaning.
3. Tap thrice for high-speed setting. Display panel should show "3"
The high-speed setting allows for rapid purification.

The fan speed control ensures you have the flexibility to adapt the air purifier's performance to match varying indoor air quality levels and specific preferences.

7

Pre-set Modes

The DAWN Plus UV Air Purifier comes with intuitive pre-set operation modes to suit various preferences and situations. There are 3 modes to choose from – Sleep Mode, Automatic Mode, and Fast Mode.

1. Tap once for Sleep Mode
In Sleep mode, the display shows "S," with the lowest fan speed. Air quality light, and touch screen panel lights will be turned off, creating a serene environment for restful nights.
2. Tap twice for Automatic Mode.
In Automatic mode, the display shows "A," and the purifier dynamically adjusts the fan speed based on detected air quality using PM2.5 data, ensuring efficient purification when needed.
3. Tap thrice for Fast Mode.
When immediate and maximum purification is required, switch to Fast Speed mode, displayed as "F," for powerful and rapid air cleaning.

With these convenient modes, you can effortlessly optimize your air purifier's performance, enjoying cleaner and healthier air tailored to your specific needs.

8

Child Lock Function

Our DAWN Plus UV Air Purifier is equipped with a child lock function, providing peace of mind for families with little ones around.

To activate the child lock, press and hold the button for 3 seconds until you hear a confirming "beep" sound. Once engaged, the air purifier enters child lock mode, preventing accidental adjustments. During this mode, all buttons are disabled, ensuring the purifier's settings remain undisturbed. To exit child lock mode, press and hold the button for 3 seconds until you hear a confirming "beep" sound.

With the child lock in place, you can rest assured that your air purifier will continue to operate efficiently and safely, while your curious little explorers stay protected.

Filtration & Sterilization Technology

Our DAWN Plus UV Air Purifier incorporates a powerful combination of cutting-edge filtration and sterilization technologies.

Filtration Information

Our DAWN Plus UV Air Purifier incorporates a powerful combination of filtration and sterilization system to ensure the purest air quality.

- The Pre-Filter effectively captures larger particles, such as dust and pet dander, prolonging the life of the main filters.
- The Medical Grade HEPA 13 Filter is designed to trap microscopic particles, including pollen, mold spores, and bacteria, providing exceptional air purification.
- The Nano Photocatalyst Filter neutralizes odors and harmful gases, making your indoor environment fresher and more inviting.
- Additionally, the UVC Technology targets and eliminates harmful bacteria and viruses, contributing to a healthier living space.

With this powerful combination, you can breathe easy, knowing that the DAWN Plus UV Air Purifier is diligently working to provide cleaner, safer, and healthier air for you and your family

Filter Lifespan

Each filter in the DAWN Plus UV Air Purifier is designed to last approximately 1 year with regular use of 6-8 hours per day.

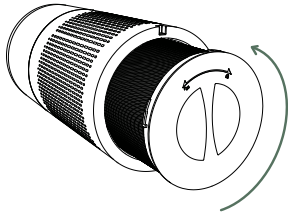

However, for those who operate the air purifier continuously, 24 hours a day, the filter lifespan may be consumed more quickly. Continuous usage places higher demands on the filter, affecting its efficiency over time.

To ensure optimal performance, we recommend monitoring the filter's condition regularly, and for continuous users, consider replacing the filter more frequently. Our priority is to maintain your air purifier's efficiency and the quality of purified air, so you can continue enjoying cleaner and healthier indoor spaces.

Filter Changing Guide

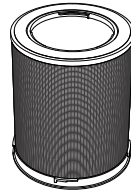

Changing The Filter

1

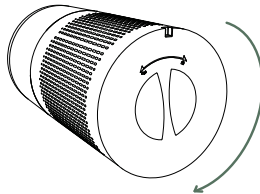

Turn cover in counter-clockwise direction to remove used filter.

2

Remove the used filter.

3

Replace used filter with a new filter, and turn cover in clockwise direction to close it.

Safety Reminder:

Turn off the power before changing the filter in your DAWN Plus UV Air Purifier for your safety.

Product Specification

Product Name	DAWN Plus UV Air Purifier
Model No.	FTL-006
Dimensions	260MM (W) x 260MM (D) x 500MM (H)
Net Weight	3.6 kg
Power	100-240V / 50-60Hz
Power Consumption	30W
Noise	33.1dB(A)-55.6dB(A)
Coverage Area	40 SQM / 430 SQFT
Clean Air Delivery Rate (CADR)	350M ³ /HR
